

# ROSARIO MARTÍNEZ MARTÍNEZ

Grupo de Investigación: FISIOLÓGÍA DIGESTIVA Y NUTRICIÓN (Cod.: AGR145)

Departamento: Universidad de Granada. Facultad de Farmacia

Citas en Google Scholar: <https://scholar.google.es/citations?user=vYgAb5MAAAAJ&hl=es>

Código ORCID: <http://orcid.org/0000-0003-2032-1621>

RG: [https://www.researchgate.net/profile/Rosario\\_Martinez3](https://www.researchgate.net/profile/Rosario_Martinez3)

Código: 63859

Ficha del Directorio

## Producción 18

Artículos (18) Libros (0) Capítulos de Libros (0) Tesis dirigidas (0)

## Proyectos dirigidos 0

Proyectos (0) Contratos (0) Convenios (0)

## Actividades 0

Titulo publicación	Fuente	Tipo	Fecha
Efectos del ejercicio aeróbico interválico, combinado con entrenamiento de fuerza y de la restricción calórica, sobre la composición corporal de ratas obesas	Revista andaluza de medicina del deporte	Articulo	2017
Effects of hypertrophy exercise in bone turnover markers and structure in male growing rats	International journal of sports medicine	Articulo	2017
The combined intervention with germinated vigna radiata and aerobic interval training protocol is an effective strategy for the treatment of non-alcoholic fatty liver disease (nafld) and other alterations related to the metabolic syndrome in zucker r	Nutrients	Articulo	2017
Effects of a moderately high-protein diet and interval aerobic training combined with strength-endurance exercise on markers of bone metabolism, microarchitecture and turnover in obese zucker rats	Bone	Articulo	2016
Effects of interval aerobic training combined with strength exercise on body composition, glycaemic and lipid profile and aerobic capacity of obese rats	Journal of sports sciences	Articulo	2016
Medicago sativa l., a functional food to relieve hypertension and metabolic disorders in a spontaneously hypertensive rat model	Journal of functional foods	Articulo	2016
Stanozolol decreases bone turnover markers, increases mineralization, and alters femoral geometry in male rats	Calcified tissue international	Articulo	2016
Aerobic interval exercise improves parameters of non alcoholic fatty liver disease (nafld) and other alterations of metabolic syndrome in obese zucker rats.	Applied physiology, nutrition, and metabolism	Articulo	2015
Co-inoculation of halomonas maura and ensifer meliloti to improve alfalfa yield in saline soils	Applied soil ecology	Articulo	2015
Efectos de un protocolo de entrenamiento de alta intensidad sobre marcadores fisiológicos de estrés en ratas/physiological effects of the stress induced by a high-intensity exercise protocol in rats	Revista internacional de ciencias del deporte	Articulo	2015
High-intensity exercise modifies the effects of stanozolol on brain oxidative stress in rats	International journal of sports medicine	Articulo	2015
High-protein diet induces oxidative stress in rat brain: protective action of high-intensity exercise against lipid peroxidation	Nutrición hospitalaria	Articulo	2015
Improvement of the antioxidant and hypolipidaemic effects of cowpea flours (vigna unguiculata) by fermentation: results of in vitro and in vivo experiments: health benefits of raw and fermented v. unguiculata	Journal of the science of food and agriculture	Articulo	2015
Interaction between orexin a and cannabinoid system in the lateral hypothalamus of rats and effects of subchronic intraperitoneal administration of cannabinoid receptor inverse agonist (am 251) on food intake and the nutritive utilization of protein	Journal of physiology and pharmacology	Articulo	2015
Interval aerobic training combined with strength-endurance exercise improves metabolic markers beyond caloric restriction in zucker rats	Nutrition, metabolism, and cardiovascular diseases	Articulo	2015
Medicago sativa l.: mejora y nuevos aspectos de su valor nutritivo y funcional por co-inoculación bacteriana	Nutrición hospitalaria	Articulo	2015
Health promoting effects of lupin (lupinus albus var. multolupa) protein hydrolyzate and insoluble fiber in a diet-induced animal experimental model of hypercholesterolemia	Food research international	Articulo	2013
Novel effects of the cannabinoid inverse agonist am 251 on parameters related to metabolic syndrome in obese zucker rats	Metabolism, clinical and experimental	Articulo	2013
